FOR SMALLER
COLLEGES.

It is now announced that the recent gift of John D. Rockefeller of \$10,000,000 to the General Board of Education was accompanied with the stipulation that the money was to be used for country. The interest of the fund, the small colleges throughout the country \$500,000 a year, is to be used at the discretion of the General Education Board to add such colleges as the board shall consider most useful. The board may spend the money to aid any of the great universities in its discretion, but the beneficiaries which Mr. Rockefeller had in mind were the small colleges. He believes that too large a share of the present splendid gifts for education go to the universities and he designs this fund to restore the balance. The needs of many small colleges are pressing, but the tendency is to overlook them in our national passion for bigness. This fund is a recognition that the small college does a work which the great university cannot do. There is much the same difference between attending a small college and a great university that there is between living in a small town and in a city. Everybody admits that the wholesomeness and simplicity of a small town are helpful, especially during the period of growth. Nobody would rear boys in a city block if he had a chance for them on a farm. With some boys the maintenance of simple standards and an out of door life is valuable after college age. In such boys the training of a small college hardens fiber where the stimulus of a great university would weaken it. The trouble has been heretofore that most small colleges have been so hampered for funds that their teaching equipment and the quality of their faculties suffered. This gift will in good measure redress that disadvantage.

The form of the gift is also wise. The General Education Board will receive this money from Mr. Rockefeller. Individual colleges will receive it from the General Education Board. The obligation and the gratitude of the colleges will thus be due to the board and not directly to Mr. Rockefeller.

BRIDGE THIS GAP.

The Globe Belt announces the completion of the telephone line connecting Globe with Roosevelt, the town at the Tonto-Basin reservoir works. The completion of this line from Roosevelt to Globe connects this latter city with Phoenix, Prescott and Tucson.

Now let the owners of the Tucson line build to Benson and connection will be made with all important points in Cochise county—Benson, Tombstone, Bisbee, Naco and Douglas. The distance from Tucson to Benson is only about forty-five miles; with the building of the telephone line over this gap practically every important town in the territory except Yuma would be connected by phone, from Douglas to Flagstaff. This matter should be attended to at once, as it would be of great convenience to the public.

With a reasonable rate the line would get a good patronage; certainly the amount of business which would go over the long distance line from Cochise county would soon return the money required to build a line from Tucson to Benson.

The long distance line would do a great deal more business if the managers would be more reasonable in prices. There is no cause for complaint on the charges between Douglas and Bisbee, but the tolls to Tombstone and Benson are ridiculously high and the line might as well not be there. The telegraph line is used between all points in the county and Benson, rather than pay the outrageous tolls over the phone.

Let the gap be filled in between Tucson and Bisbee and then if Mr. Hams refuses to be reasonable in his charges for long distance let the line be extended on to Bisbee.

THE POWER OF STEAM.

Many May See That It Takes Genius to Monitor.

When James Watt saw the steam raising the kettle lid to jump up and down he said "There must be power in that steam that it can lift such a weight."

There was. Millions prior to him had seen the same phenomenon and regarded it as an unexplained mystery. Recent scientific research has put its finger on the "cause" of Watt's discovery. He had, and consequent Watt's, and the unthought a tiny germ which sets life from the roots of human hair. Newton's Herpetus destroys this germ and consequently restores the water to its natural state. Sold by leading druggists. Send 10c. to demand for sample to The Herpetus Co., Detroit, Mich.

PHOENIX MAYOR
HAS RESIGNED.

J. C. Adams has tendered his resignation as Mayor of the city of Phoenix. The resignation was tendered the city council Monday night after a majority of the council had waived rough shod over the mayor by firing a commission which had been previously appointed by the mayor and approved by the council to have charge of the municipal ownership of the water system. The majority of the council stated that they believed that the mayor was deliberately trying to prevent the providing of a water system by the city and was delaying every action which was necessary to give the city the water system in accordance with the well known wishes of the people. Not only did the city council fire Mayor Adams' water commissioner, but they then and there awarded the \$200,000 in city bonds to a Cincinnati firm on its bid of par and accrued interest. Against these acts of the council Mayor Adams pleaded for delay; finding that his advice was worthless so far as the majority of the city council was concerned, Mr. Adams tendered his resignation as mayor of the city and left the room.

In the resignation of Mayor Adams it is the opinion of this paper that Phoenix has lost the best mayor it ever had. Adams is noted for his public spirit and liberality in pushing Phoenix and Phoenix enterprises to the front and a man of this character can be of vast benefit to a city like Phoenix which has many important things ahead which will demand public spirit and liberality to handle them. Phoenix is a republican city and Mr. Adams' successor will be a republican, but we very much doubt if he will be in a position, whoever he may be, to accomplish as much for the city as could J. C. Adams.

As to the merits of the local controversy in Phoenix we are not in position to judge, but we are of the opinion that Phoenix will be the loser because of the resignation of J. C. Adams as mayor.

CAUGHT IN THE TOILS.

Senator John H. Mitchell, of Oregon, four times United States Senator from that state, a patriarch in age and appearance, a man of distinguished ability and great learning, has been convicted by a jury of his home county in the Federal court of a crime which will land him in the penitentiary unless a new trial is granted. The crime for which the Senator is convicted was practicing law and receiving a fee from a client before a federal department while a member of the Senate. The evidence is practically conclusive that the Senator is guilty and his conviction and punishment follows in the natural order of things.

During the last two years three United States Senators have been arrested and tried on similar charges which is practically using their influence and position to further their own selfish ends. Deitrich, of Nebraska, escaped through a technicality. Burton, of Kansas, was tried and convicted and secured a new trial and will be tried again.

We have no doubt that the arrest and trial of these men will have a salutary effect upon the morals of men in public life and do much towards weeding out and putting an end to the grafting and shady methods by which some of those in high places accumulated riches to the expense of the country.

Of course, everybody has great sympathy for Mitchell in his old age and broken health but the law will claim its own and he who violates it

\$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

reaps his own reward. One of the best signs of the times is the tendency to a more strict enforcement of the law and the punishment of men for misdeeds who occupy positions of honor and responsibility.

Sensor Mitchell was prosecuted by Frank J. Heizer, formerly of Arizona, and this fact adds additional interest to the case in this territory.

This shouting for statehood under any conditions will not meet with any approving response in this territory. Arizonians want statehood on the same terms and conditions which has been given to other states at the time of their admission.

The Gazette, of Phoenix, nails in takes a fall out of ex-Mayor J. C. Adams. As Adams has many times in the past taken a fall out of the Gazette, this is a case of evening up things.

We would suggest that John Dunbar get between Charlie Akers and J. C. Adams and prevent these two republican worthies from getting together this warm weather.
